## Professional Summary

Supply Chain Management Analyst with 9+ years of experience driving demand planning, supply readiness, and cross-functional process optimization across global operations. Proven ability to translate business requirements into scalable planning workflows, KPI governance frameworks, and operational improvements. Currently pursuing an M.S. in Business Analytics at the University of Washington.

## Skills & Tools

**Supply Chain & Process Excellence:** Demand planning, supply–demand balancing, inventory governance, capacity planning, exception management, KPI development, cross-functional process ownership

**ERP & Analytics Systems:** SAP (transactional reporting), Excel (advanced), SQL (Azure SQL DB), Tableau, Power BI, Azure ML Studio

**Modeling & Insights:** Forecast accuracy & bias analysis, scenario modeling, risk mitigation, dashboard development

## Professional Experience

<b>Keurig Dr Pepper</b> <i>Warehouse Optimization Consulting Project</i>	<b>June 2025 – Present</b> <i>Sumner, WA</i>
<ul style="list-style-type: none"><li>Own an end-to-end warehouse optimization program supporting capacity planning, inventory health, and throughput performance.</li><li>Analyze SAP MB51 records using SQL, Excel, and Tableau to identify demand patterns, constraints, and utilization gaps.</li><li>Develop forecast-driven KPIs and dashboards to support planning trade-offs across space, service, and lead time.</li><li>Translate business planning requirements into SAP-based reporting structures and KPI dashboards to improve process visibility and decision latency.</li></ul>	

<b>Zebra International Distribution LLC</b> <i>Head of Import Department</i>	<b>Feb 2023 – Jun 2025</b> <i>Ulaanbaatar, Mongolia</i>
<ul style="list-style-type: none"><li>Owned end-to-end supply planning and fulfillment processes across 13 countries, serving as process authority for forecast governance and supplier performance management.</li><li>Developed rolling demand plans integrating supplier constraints, lead times, and operational capacity signals.</li><li>Led cross-functional resolution of demand–supply imbalances through structured exception management and corrective action plans.</li><li>Established KPI frameworks to monitor forecast bias, inventory turns, service level attainment, and supply risk exposure.</li><li>Defined and standardized planning workflows to improve process consistency and decision transparency across regions.</li></ul>	

<b>Epiroc</b>	<b>Oct 2018 – Feb 2023</b>
<i>Supply Chain Specialist/ Maintenance Planner</i>	<i>Ulaanbaatar &amp; South Gobi, Mongolia</i>
<ul style="list-style-type: none"> <li>Supported material demand planning for 40+ heavy assets, aligning parts availability with forecasted maintenance schedules.</li> <li>Developed usage-based demand models aligned with maintenance schedules and production continuity requirements.</li> <li>Collaborated with procurement and operations teams to mitigate material shortages and ensure supply continuity in high-variability production environments.</li> </ul>	

<b>Zebra International Distribution LLC</b>	<b>Jan 2016 – Oct 2018</b>
<i>Import Manager</i>	<i>Ulaanbaatar, Mongolia</i>
<ul style="list-style-type: none"> <li>Managed \$1.5M+ demand-driven inventory flows, planning inbound volumes based on forecasts, lead times, and capacity.</li> <li>Improved forecast reliability through enhanced tracking, reporting cadence, and exception management.</li> </ul>	

## **Education**

---

- University of Washington – Master of Science in Business Analytics (Expected Jun 2026)  
Relevant Focus: Data-driven decision modeling, predictive analytics, process optimization
- Mongolian University of Science & Technology – MBA; BBA, Mining Management
